

Wisdom Leadership – East and West

An intriguing one-day workshop was organized by CMS Business School, Jain (Deemed-to-be University), for the first-year MBA students on February 8, 2018.

The teaching-learning pedagogy in CMS Business School goes beyond the classroom textbook and believes in preparing students to face every challenge of the industry-transforming them into confident and competitive next-generation leaders.

The keynote speaker for the event was Dr. Rajaram, Associate Professor & HOD, St. Joseph College, Bangalore. He enlightened the students on aspects such as the qualities and skills required to play efficient leadership and managerial roles.

In the rapidly evolving business environment, the ability to adapt, prepare, and lead through the challenges and changes is quickly becoming the business skill for those wanting to succeed in their corporate career. Leadership is at the core of the program's purpose as it is considered a soft skill that many possess but struggle to implement proactively.

The students were also involved in enthusiastic activity sessions to act as leaders in stressful situations and were required to make the right decision for the benefit of the organization. However, the workshop was an enriching learning experience for the students to be the business leaders of tomorrow.
