Theme

This program will help fill the void of competent finance faculty and scholars with a research bent of mind in the management education domain. The program intuitively highlights the strategy in topic selection, critical analysis, methodology design for the problem chosen, statistical tools and technique efficiency, empirical analysis, and the finance research philosophy. The program further highlights the evaluation and re-evaluation of the research topic for significant scientific contributions to the existing literature body. The research methodology suitable, hypothesis development, critical assessment of experimental analysis, and new insights and future research scope in finance. Financial Management course is undertaken by many students at post graduate and under-graduate levels and as a part of professional exams. The principles of financial management are relevant to all types of firms and many concepts like time value of money, investment appraisal have found way to real life situations. However, a sizable number of students find the course challenging. It is therefore important to understand the difficulties faced by students and to improve/ modify teaching methods to facilitate better learning.
